

ALL YOU NEED TO KNOW ABOUT US

WHAT WE DO

With more than 40 employees, we have been active beyond the borders of Germany for more than 60 years.

As a distributor and highly qualified partner, our focus is particularly on technical design-in and sales. We supply components ranging from standard parts to customer-specific products, which we develop together with our suppliers.

We see a high importance in working closely with well-known and established manufacturers who are among the world market leaders in their respective sectors.

As one of the few companies with aviation approval, we guarantee the highest quality standards with our certifications according to DIN EN ISO 9001:2015 and EN 9100:2018.

WHERE WE ARE

Our company headquarters with the attached warehouse logistics is located in Norderstedt near Hamburg. Organization, order processing and logistics are controlled from here.

Our sales engineers are based regionally and are operating from locations throughout Germany and Austria.

HOW WE WORK

Our sales engineers are forming a personal link to our customers. They support you in determining technical requirements, the commercial framework and are there for you as a contact person on site.

The product specialists and the office team at the company headquarters take care of the offer and order processing as well as all commercial and organizational challenges. The close and product-related contact with our manufacturers guarantees technically qualified and fast processing.

The flow of goods is controlled by our self-administered warehouse logistics at the headquarters.

WHAT ELSE DO WE OFFER?

- Labeling
- End of life solutions
- Confection
- Storage and logistics solutions (KANBAN, consignment warehouse, Just In Time, EDI, etc.)
- Assembly
- Prototyping
- Sawing
- Cutting

MANUFACTURERS

- solid state relay
- Reed relay
- Sensors
- Temperature controller

- Protective hoses
- EMV
 - Insulation
 - mechanical protection
 - thermal protection

- Encoder
- Printer
- Safety relay
- Counter

WE MAGNETISE THE WORLD

- Propulsion systems
- Electromagnets
- Pneumatics

- Electric, pneumatic drives
- Ionizers
- Valves, valve islands
- Cylinder

- Adhesive, sealing silicones
- Heat management
- Thermal foils

- Pneumatics

- Automotive relay
- DC high power relay
- PCB relay
- Signal relay

Expertise Applied | Answers Delivered

- C&K switches
- ESD protection
- IXYS
- Polyswitch fuses
- Reed switches
- Relays: Reed, Solid State
- Sensors
- Fuses
- TVS diodes
- Overvoltage protection elements
- Varistors

- Press-fit technology
- High current contacts
- contact elements
- Power elements
- Fuse holder and relay socket
- Connector (Wire2Board)

AUTHORIZED DISTRIBUTOR

- Antennas
- DC high power relay
- E-mobility components
- High current connector
- Cables and lines
- Identification
- Mains filter
- Switches
- Heat shrink tubing
- Connectors
- Connector Backshells
- Buttons
- Solder Sleeves
- Automotive relay
- PCB relay
- Signal relay
